Ayanna Pressley (D-MA) on Sunday tore into President Trump for re-upping his attacks on four freshman progressive House Democrats who voted against a border spending bill on Friday, calling the president's outburst "petty." Pressley, who is the first member of Congress to endorse Bernie Sanders in the 2020 presidential race, pointed to comments Trump made last week during a cabinet meeting where he blasted the four lawmakers — Reps. Alexandria Ocasio-Cortez (D-NY), Ilhan Omar (D-MN), Ayanna Pressley (D-MA), and Rashida Tlaib (D-MI) — for opposing the legislation. "Four hard-working Congresswomen, who I truly believe, are fighting for their constituents and America," the president said at the meeting. "We will support them." The president's statement came a day after he tweeted his disdain for the four lawmakers, who are all of color, for voting against the legislation, which included a four-year extension of temporary protections for those brought to the country as children. "All they want to do is impeach you," Trump told the four Democrats during the meeting. "They are crazy. They want to ruin your lives. They want to do whatever they can to destroy you. They are a bunch of Communists." The four lawmakers responded to the president's remarks at the meeting and he subsequently released a statement saying they were "ignorant" and "just cannot understand the decision to vote against a vital bill that will keep our government open," before

Start Autocad. If the product key has not been activated, a message will appear as follows:  

### What's New in the?

**Incorporate and Update Dependencies:** Drawings without a unique ID (auto-generated) will have an automatically updated “dependency” property that can be specified to update all drawings that are dependent on the drawing without a unique ID. This helps you to ensure that you don’t inadvertently change drawing changes that should remain unchanged. In addition, CAD data to other databases and applications can be imported based on dependencies. (video: 1:20 min.)

**Incorporate and Update Templates:** Efficiently create templated drawings by importing from templates. If an imported drawing has an identical template, the unique ID of the imported drawing will automatically replace the one of the template. If the template has a unique ID, the replacement will be ignored. (video: 1:36 min.)

**Faster and Easier Support:** Introducing the new “Help” and “Support” tools in the AutoCAD application. Learn how to use these to get the support you need—from troubleshooting to the source code—with as little time as possible.

**C-Macro Expressions:** “Macro expressions” are a powerful new way to run CAD commands from a text file. They can be created and run directly from the command line. In addition, you can create “macro scripts” and bring them into your drawing for use with the command-line interpreter. There’s even a new “Macro Help” tool that automatically displays any macro expressions and descriptions that are available for the current drawing, and “Macro Assist” that can be used to quickly create and run macro scripts and to search for existing macro expressions.

**Calculate Performance:** The new 2D, 3D, and compound commands, including 2D/3D Rotate, 2D/3D Scale, 2D/3D Translate, 2D/3D Affine, 2D/3D Mirror, 2D/3D Perspective, 2D/3D Shear, 2D/3D Project, 2D/3D Align, 2D/3D Rotation, 2D/3D Scaling, 2D/3D Translation, 2D/3D Affine, 2D/3D Perspective, 2D/3D Shear, 2D/3D Rotate, 3D/2D Translate, 3D
